R.G.S.

**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The examiner respectfully asserts that none of the prior art, taken either singly or in combination, is seen to teach or disclose the use of a support device comprising the particular structure of a conformable member, a plurality of support members, and fastening means or a fastening device including "a plurality of hollow sleeves *with an extended strip of material* for coupling each of the hollow sleeves to a portion of the conformable member *at coupling points inwardly spaced from edges of the conformable member*", thereby allowing each support member to be *moveable about its respective coupling point* as presently stated in Applicants' sole independent claims 1 and 15. (Most conventional prior art devices merely include a plurality of hollow sleeves directly connected to the edges of an associated conformable member, or include a plurality of hollow sleeves each fixedly secured to the top surface of an associated conformable member through a selectively adjustable hook and loop fastener assembly or each having two opposed edges attached to a supporting surface of an associated conformable member wherein in both cases the support members remain in a single fixed position relative to the conformable member.) Consequently, it is considered that the application is currently in proper condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
